

Informational Circular

IC-2015-09

TO: BOX Options Participants
FROM: BOX Market Operations Center
SUBJECT: Implementation of the UDP Multicast Feed for the HSVF
DATE: June 4, 2015

The UDP Multicast Feed, a new transmission mechanism for the High Speed Vendor Feed ("HSVF"), is now available on NY10 and will be available on NY4 on **Monday, June 15, 2015**.

Please refer to Informational Circular [IC-2015-05](#) for more details on this offering.

Technical Details

Please refer to the "[SOLA® Network Connection Specifications for BOX v2.1](#)" document for specific connectivity details.

Testing

Participants interested in testing this new feature may do so in the BOX Test environments. As a reminder, VPN connections are not compatible with UDP Multicast Feed and the test UDP Multicast Feed will only be available from the Production POPs.

The implementation timeline is as follows:

IMPLEMENTATION DATE	DESCRIPTION	LOCATION
Available now	TCP Retransmission feature	Test Environments (VPN)
	UDP Multicast populated with Production Market Data	NY10 Production
June 15, 2015	UDP Multicast populated with Test Market Data	NY4 Production
	UDP Multicast populated with Production Market Data	

Contact

Please contact the Market Operations Center at (866) 768-8845 or by e-mail at BOXMOC@boxexchange.com should you require additional information.
