

BOXX[®]
OPTIONS EXCHANGE

Informational Circular

IC-2016-07

TO: BOX Options Participants
FROM: BOX Market Operations Center
**SUBJECT: Enhanced Price Protection – Reactivation and NBB/NBO
Parameter Change**
DATE: March 18, 2016

Effective **Monday, March 21, 2016**, the Enhanced Price Protection during Continuous Trading feature will be reactivated¹ and available to all Participants.

Also effective **Monday, March 21, 2016**, the National Best Offer (“NBO”) and National Best Bid (“NBB”) price parameter set by BOX Options Exchange (“BOX” or “Exchange”) for incoming Limit Orders will **increase from \$.25 to \$3.00**.

The price parameters for all incoming Limit Orders will be set at the price 100% greater than the NBO (for incoming buy orders), and 100% less than the NBB (for incoming sell orders), when the NBB/NBO is priced at or below **\$3.00**; and the price parameters are set at the price 50% greater than the NBO (for incoming orders), and 50% less than the NBB (for incoming sell orders), when the NBB/NBO is priced above **\$3.00**.

While the Exchange sets these price parameters to enhance price protection during continuous trading, BOX strongly encourages its Participants to specify their own threshold values on an underlying security basis, for: (i) the cut-off price, (ii) the price parameters, and (iii) minimum price variation. By setting their own threshold values, Participants are able to apply more restrictive controls when needed.

For more information about Enhanced Price Protection during Continuous Trading, see [SR-BOX-2015-05](#).

Contact

Please contact the Market Operations Center at (866) 768-8845 or by e-mail at BOXMOC@boxexchange.com should you require additional information.

¹ See IC-2016-04. The Enhanced Price Protection during Continuous Trading feature was deactivated until further notice.
